

Jaume Campderros

Experienced full-stack software engineer with 6+ years of expertise, specializing in front-end development. Passionate about creating seamless user experiences and delivering high-quality, performant products. Skilled in collaborating with international teams, optimizing performance, and ensuring code quality. Eager to apply my skills in a dynamic and innovative environment.

Relevant Experience

Software Engineer • **Quantion** Jun 2022 — Jun 2024

- Contributed to the design, architecture, and development of a new Lufthansa Airlines loyalty project from scratch, collaborating with international teams to align on API implementations and resolve blockers.
- Developed frontend features for the Lufthansa Airlines loyalty platform using React, TypeScript, SCSS, Vite and Vitest.
- Improved performance by optimizing Azure DevOps pipelines for automated builds and deployments.
- Integrated SonarQube into the development workflow to ensure code quality and enhance test coverage.
- Conducted code reviews for both team and cross-team projects, promoting best practices and maintaining high code quality standards.
- Managed projects efficiently using Azure DevOps and Jira, ensuring on-time delivery and client satisfaction.
- Collaborated with international teams within the Lufthansa Group Digital Hangar to ensure alignment on project goals and technical requirements.
- Developed a customer support chatbot for the Lufthansa Group main website, improving customer interaction with support and refunds using React, JavaScript, and SCSS.

Software Engineer • **Giesecke+Devrient** May 2020 — Jun 2022

- Developed full-stack internal web applications, ensuring high performance and reliability across projects.
- Worked on frontend development using Angular, TypeScript, and CSS, creating user-friendly interfaces.
- Designed and implemented internal API services to integrate with external systems using Java and Spring Boot.
- Implemented CI/CD pipelines with Jenkins and Bitbucket, ensuring smooth deployments and maintaining code quality with SonarQube and BlackDuck.
- Served as Scrum Master when required, coordinating team efforts and ensuring timely delivery.
- Collaborated remotely with an international team, ensuring alignment on project goals and delivering client requirements.
- Employed Docker containers and virtualized servers to enhance the scalability and performance of the software.

Frontend Developer • **Vip District** Sep 2018 — Jan 2020

- Developed frontend features for the company's employee engagement platform using React, JavaScript, and SCSS.
- Collaborated with the backend team to integrate services using Java, Spring Boot, and MySQL.
- Conducted unit testing with Jest and JUnit, ensuring code reliability and performance.
- Implemented Jenkins and SonarQube for continuous integration and code quality assurance.
- Actively participated in code reviews, ensuring best practices and high-quality standards.
- Managed the project using Slack for project management and communication.

Education

University of Barcelona

Bachelor's degree in Computer Science focused on software engineering, algorithms, programming, operating systems, databases, and networks.

Skills

Programming Languages

JavaScript, TypeScript, HTML, CSS, Sass, GraphQL, Java.

Libraries & Frameworks

React, Next.js, Angular, Tailwind CSS, Styled Components, Framer Motion, Vite, Redux, Zustand, Spring Boot.

Tools & Platforms

Git, GitHub, Docker, Bitbucket, Adobe Experience Manager, Figma, Storybook, Webpack, Jira, Slack, Supabase.

Testing & Quality Assurance

SonarQube, Jest, Vitest, Jasmine, Karma, JUnit, Mockito.

CI/CD Tools

Azure DevOps, Jenkins.

CMS & Deployment

Vercel, Firebase, Netlify, WordPress.

Selected Projects

Packer Nomads

Developed a scalable web application enabling users to efficiently plan trips and organize personalized packing lists. Focused on delivering an intuitive user experience and laying the groundwork for future feature expansion.

Elena Isa - Yoga Teacher

Designed and built a personalized website for a client to showcase services, events, and brand identity. Delivered a user-friendly platform tailored to enhance the client's online presence and engagement.

Languages

English

Full professional proficiency.

Spanish

Native or bilingual proficiency.

Catalan

Native or bilingual proficiency.
