Relevant Experience

Software Engineer · **Quantion**   Jun 2022 — Jun 2024

- Developed new frontend features for Lufthansa Airlines loyalty platform using React, TypeScript, SCSS, Vite, and Vitest.
- Implemented Figma designs into pixel-perfect web components using Adobe Experience Manager and Storybook.
- Created and maintained Azure DevOps pipelines for automated builds and deployments to testing and production environments.
- Ensured code quality and test coverage by integrating SonarQube into the development workflow.
- Conducted pull requests and code reviews for both team and cross-team projects, promoting best practices and maintaining a high standard of code quality.
- Developed a customer support chatbot for the Lufthansa Group main website with capabilities like customer support and refunds, using React, JavaScript, and SCSS.
- Managed projects efficiently using Azure DevOps and Jira, ensuring on-time delivery and client satisfaction.
- Collaborated with international teams within the Lufthansa Group Digital Hangar, providing support and technical assistance for various projects.
- Utilized Scrum methodology with Jira, Confluence, and Azure DevOps for project management and team collaboration.

Software Engineer · **Giesecke+Devrient**   May 2020 — Jun 2022

- Crafted and designed various full-stack internal web products, consistently maintaining high performance and reliability.
- Managed frontend development using Angular, TypeScript, CSS, and Angular Material to create user-friendly interfaces. Testing was conducted using Jasmine & Karma.
- Created an internal API service for seamless communication with external APIs within the company, employing Java and Spring Boot. Testing was conducted using JUnit 5 and Mockito.
- Implemented Scrum as a work methodology and served as Scrum Master when required, coordinating team efforts and ensuring timely project delivery.
- Employed Jenkins and Bitbucket in our CI/CD pipeline, while also utilizing SonarQube and BlackDuck to maintain code quality and security standards.
- Managed projects using Jira, ensuring that deliverables met client requirements and standards.
- Employed Docker containers and virtualized servers to enhance the scalability and performance of the software.
- Collaborated remotely with an international team, showcasing strong communication and interpersonal skills.

Developer · **Vip District**   Sep 2018 — Jan 2020

- Designed and implemented various frontend features and enhancements for the web platform of a leading employee engagement company using React, JavaScript, and SCSS.
- Performed unit testing with Jest to ensure code reliability and performance.
- Collaborated closely with the backend team to develop and maintain new services using Java, Spring Boot, and MySQL.
- Conducted unit testing using JUnit 5 and Mockito.
- Conducted thorough code reviews on pull requests to maintain high-quality code and promote best practices.
- Implemented Jenkins and SonarQube to guarantee code quality and security.
- Managed the project using Slack for project management and communication.

Education

University of Barcelona

Bachelor's degree in Computer Science with a focus on software engineering, algorithms, programming languages, operating systems, databases, and computer networks.

Skills

Programming Languages

JavaScript, TypeScript, HTML, CSS, Sass, GraphQL, Java.

Libraries & Frameworks

React, Next.js, Angular, Tailwind CSS, Styled Components, Framer Motion, Vite, Redux, Spring Boot.

Tools & Platforms

Git, GitHub, Docker, Bitbucket, Adobe Experience Manager, Figma, Storybook, Webpack, Jira, Slack.

Testing & Quality Assurance

SonarQube, Jest, Vitest, Jasmine, Karma, JUnit, Mockito.

CI/CD Tools

Azure DevOps, Jenkins.

CMS & Deployment

Vercel, Firebase, Netlify, WordPress.

Selected Projects

Elena Isa - Yoga Teacher

Designed and developed a personalized digital hub for a client using React, TypeScript, and Tailwind CSS, encompassing bespoke website design, code implementation, and brand identity establishment.

Prota House - Real Estate

Customized web solution for a client. This project was built using WordPress and involved a complete redesign of the website, with a focus on prioritizing data integrity.

Languages

English

Full professional proficiency.

Spanish

Native or bilingual proficiency.

Catalan

Native or bilingual proficiency.
